MANHATTAN OR LONG ISLAND.

***The effective use of the SMART Board™
interactive whiteboard in today's classroom:***
How to evaluate and improve teacher skills for the
emerging interactive classroom.

Teqsmart
Learning for educators.

The interactive whiteboard is one of the most revolutionary tools for improving teaching effectiveness at all grade levels. Administrators need to know how well their teachers are using this evolving technology, and how teachers can be successfully trained to use interactive whiteboard technology. That's where Tequipment's TeqSmart training program comes in. We work with administrators to develop and improve the ability of teachers to interactively engage their students and to promote the creativity needed to implement new interactive whiteboard teaching methods. The Tequipment SMART Board Academy is a TeqSmart program specifically geared toward helping administrators evaluate the effective use of the interactive whiteboard and its integration into the classroom.

The Tequipment SMART Board Academy is a wonderful opportunity for administrators to receive the training needed to accomplish these goals. We can show you how to evaluate your teachers' use of the interactive whiteboard and supply any needed training to bring your teachers to a high level of familiarity with interactive whiteboard skills and methods.

When & Where?

Tequipment's SMART Board Academy, July 7th through August 14th, is offered **free to central administrators, regional administrators, learning center administrators, principals, assistant principals, regional staff developers, and school-based coaches**. All the courses are taught by TeqSmart SMART Certified Master's Trainers, who are also NYS certified teachers. Sessions are held at two locations: SMART Technologies, Inc. showroom at 200 Lexington Avenue, The Design Center Building (between 32nd and 33rd Streets) Manhattan, and Tequipment's showroom, 95 Toledo Street, Farmingdale.
