# GIFC.TQ

Creating GIF's was my favorite thing to do from everything else we did in this class. I enjoyed creating GIF's because it was fun making them; I got to show off at school and home. Still, working with Photoshop can be very challenging. First it was challenging because you had to make sure what layer you were working on, you needed to select them, visible or invisible and the if you wanted to move the layer then you had to select it, if the layer wasn't selected and you started moving them then you were moving another layer. Still all in all making GIF's was fun and I definitely want to do them again.

My favorite GIF was my Pac Man I like it because it lasts for a really long time, and I spent a lot of time creating it I had to make a lot of different layers and it was hard. However, at the it was all worth it.
