

C.T.Q

The rollover button is a cool technique. It a technique uses to make your pictures look better. It looks more creative and prettier. It is easy to make and it is fun. You can try different things using the rollover button technique. Use different pictures to make it better. You use html codes in FrontPage to put the picture in. then you get another picture or html code and put it in. It supposes to change when you place the mouse on it. This effect makes the pictures look nice. Also it makes it look creative. This is a useful technique. It is easier if you have the codes ready and know how to apply the technique on the pictures.
