Mr. Montante

“Roll Over Button”

First you select a picture of what you like as a button. You go to Photoshop. Then you save as an image, JPEG. For the ‘Roll Over’, you make a second image, so when the mouse goes over the image, it changes. Also you save that as a JPEG. You open the first image that you made in Photoshop and paste it on Front Page. In Front Page, You insert your code in the HTML file and there you go!!!

Code:

```
</td>
```

```
<td width="478">
```
