

C.T.Q

Roll-Over button

The first step in making my roll over button was to use the code provided by Mr.Montante. I got the image code and inserted it into the code where it says "images/alumni_over2.png". Then I took that image and to Photoshop to place my name on the image. I made sure to save move images as jpeg. I then took the first image I had and inserted into the last part of the code. I used notepad to help me be more organized with the codes. Finally I took the code and inserted into FrontPage.html. Now there you go, go to normal and

your button is ready for use.
