

Testing Basic Functionality

It's a good idea to test the basic functionality of your interactive whiteboard to ensure all the applications you will be using to deliver your lesson or presentation are working properly.

- 1 Using your finger, double-press on the Internet browser icon (e.g., Internet Explorer) to launch the Internet.
- 2 Press the **On-Screen Keyboard** button on the SMART Pen Tray.

- 3 Press once inside your Internet browser's address bar to select the website address.

- 4 Using the On-Screen Keyboard, type www.google.com.

NOTE: The On-Screen Keyboard is a single point of contact; touch-typing or keystroke combinations are not possible.

- 5 Press the **Go** button beside your Internet browser's address bar.

- 6 You know you will be writing notes directly over the Google™ Web page during your lesson or presentation to highlight key points.

Pick up a pen from the pen tray. You will notice the transparency layer appears, shown by a visible border around the desktop as a visual cue. The border indicates you can write on the desktop, and it remains in place until all pens and the eraser have been returned to the pen tray and you touch the SMART board.

Transparency border appears

- 7 Using a pen, circle the browser's Back button.
- 8 Return the pen to the pen tray and touch the interactive whiteboard once to clear the circle around the browser's Back button. Press the **Click here to restore writing** icon at the bottom right of the screen to bring the circle back.

You have now confirmed that you can clear your notes by touching the interactive whiteboard, then restore your notes by pressing the **Clear here to restore writing** icon.

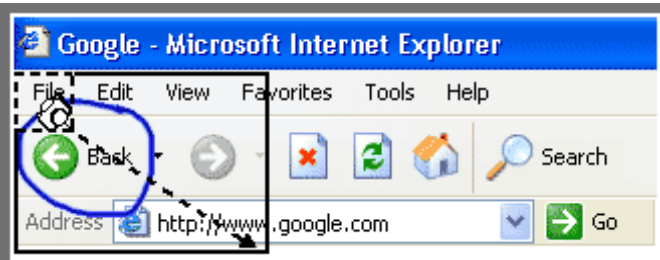

- 9 To ensure you will be able to capture and save important information for a future lesson or presentation, pick up a pen from the pen tray again. Press the **Area Capture** button on the Floating Tools toolbar.

Area Capture button

Floating Tools toolbar

- 10 Press the interactive whiteboard and, without releasing pressure, drag the selection box using your finger to outline the circle around your browser's Back button. Release your press to capture the image to Notebook™ software.

NOTE: Notebook software will open automatically, and your notes and background will be saved to a new Notebook page.

- 11 Touch the screen once to clear the circle from your browser's Back button.
- 12 Select the unsaved Notebook file from the taskbar to view your captured image in Notebook software. Select **File > Save** to save your notes for future reference.

Congratulations

You have completed the *Basic Functionality Hands-On Practice*.
